Neal D. Brown, P.E.
Director of Engineering and Planning

Ramona MWD:

Timothy N. Stanton

Timothy N. Stanton, P.E.
District Engineer

Sweetwater Authority:

James Smyth

James Smyth, P.E.
Chief Engineer

The Water Agencies' Standards Design Guidelines (WASDG), have been adopted by the Signatory Agencies for the use in planning and design of Potable Water, Recycled Water, Raw Water and Sewer Facilities within their service boundaries.

The above-signed are Engineer representatives signing only for technical review. The Signatory Agencies and Engineers are not responsible for the use of all or any portion of this document on projects built or administered by any other public agency or private entity. No representation or warranty of any kind is made concerning the accuracy, completeness, suitability, or utility of any information or product discussed in this document, and the agencies listed above assumes no liability arising from such use.

The Water Agencies' Standards Design Guide Committee (WASDGC) wishes to express its appreciation for the services provided by Consulting Engineers and Land Surveyors of California (CELSOC). CELSOC's involvement throughout the development of the WADG was instrumental in providing input and insight to industry standards through their technical review of all sections of the guidelines. CELSOC's evaluation assures that the Design Guide will be user friendly for the private development and consulting engineer who works with the various water agencies.
